

P-TECH FAQs

How is the P-TECH Model different than other early college models?

The P-TECH model relies on a strong partnership between a school district, a community college, and an industry partner. The P-TECH model is different because it provides students with the education they need to earn an industry-recognized two-year post-secondary degree as well as a high school diploma at no additional cost to the family.

Who is eligible?

Incoming Freshmen for the 2021-2022 school year are eligible to apply.

How do Industry Partners impact the Student Learning experience?

Industry Partners serve as a core component of the P-TECH Model, the commitment is not supplementary. Through this partnership, students are able to get work based industry experience that includes mentoring, site visits, speaks, project days, and internships.

Are there prerequisites?

No. Students must complete application and participate in Summer Bridge.
